

Superheater Operator

Blueline Energy Group – NEBC, AB

Job Overview

The successful candidate will be expected to live or reside within near proximity of Grande Prairie, AB

(Note: This is not a 'Fly-in Fly-out' nor 'Camp role' position). Under the supervision of the manager/supervisor, the Superheater Operator operates a frac-water heater unit equipped with a 40 million BTU burner. All duties of the Superheater Operator are to be performed according to the safe operating standards handbook in order to maximize the safety of personnel at the work site and to efficiently perform the task. The Superheater Operator must complete all paperwork including vehicle inspection reports (per DOT Regulations) and have knowledge of Federal Motor Carrier DOT Regulations.

Key Accountabilities

- Adheres to company policies and work requirements.
- Transport Super Heater safely to and from site adhering to all applicable driving legislation.
- Operating burners for heating fluids, using controls such as Valves, Gauges and Switches.
- Observing equipment gauges and indicators to monitor job activities and conditions
- Carrying and laying out hoses from the truck to water source
- Assure that frac heater is maintained and in good working condition and immediately reports any problems to supervisor and perform minor repairs as necessary.
- An understanding of basic maintenance concepts is required to repair, maintain, and adjust equipment, often using hand tools.
- Assure that required paperwork is completed accurately and forwarded to supervisor daily.
- Responsible for conducting all field activities safely and accurately.
- Responsible for operating and maintaining company equipment properly.
- Attend all required safety meetings.
- Helping teammates on location to set up and tear down as needed.
- Must complete Vehicle Inspection Report daily and forward to supervisor at the end of the day (per DOT regulations).
- Ability to utilize and maintain electronic records.

- Other duties as required by supervisor.

Job Requirements

Experience and Training

- Valid Class 5 Driver's License and suitable Driver's abstract.
- Valid First Aid Certificate.
- Valid H2S Alive Ticket.
- Previous oilfield experience would be an asset.
- Knowledge on implementation and execution of Fluid management would be an asset.
- Knowledge and understanding of fluid movement, pumps and pumping would be an asset.

Skills and Expectations

- Have excellent communication skills.
- Work activities may include running, maneuvering, navigating or driving vehicles or mechanized equipment, such as fork lifts or passenger vehicles depending on certificates.
- Travel to remote regions with potential to work alone.
- Must be able to pass a drug/alcohol and physical test screen.

Working Conditions

This position works outside in all weather conditions including extreme heat and cold. The company will provide adequate training and equipment to perform the functions of the job.

Business Overview

At Blueline Energy Group, we specialize in being your one stop service provider for Frac Water Management throughout Western Canada. Blueline has the capacity and expertise to assist in designing, sourcing, permitting, and delivering your fluid requirements to run a successful completion program.
